# Durability and Security

**Anti-vandal switches provide unmatched reliability and safety in vital applications across a variety of fast-growing markets.. Here are some essential features:**

## Built to Last

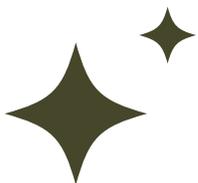

Built from high-grade materials and sealed to provide resistance to harsh conditions, corrosion and wear; selection ranging from 6mm to 40mm panel cutout.

## Tamper-Resistant

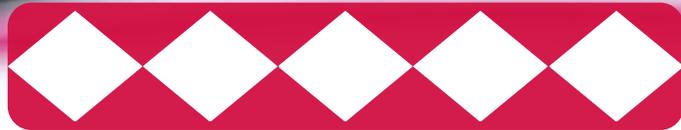

Designed to prevent unauthorized access and withstand malicious attempts to disable the switch.

## Go-to choice

Growing popularity as the ideal switch for a variety of applications due to highly customizable features; multiple wire lead assembly options available.

# Quality Construction

- Beautiful switches with housing materials in nickel, stainless steel or a clear/black anodized finish.
- Illumination voltages ranging from 3v to 250v.
- Numerous choices of LED colors, including bi-color and RGB.
- Dust and moisture protection ratings of IP65 and IP67.
