**SWITCH SOLUTIONS FOR
EV CHARGING STATIONS**

E-Switch.com

Efficiency and Reliability

This guide provides an overview of some of the E-Switch products available for use in various EV charging applications.

Built to Last

Extremely long life cycles and robust storage and operating temperatures are key switch features for designers.

Tamper-Resistant

Designed to prevent unauthorized access and sealed to high Ingress Protection ratings against moisture and dust.

Go-to Choice

Growing popularity for the EV market due to unique switch features, benefits and wire lead assembly options.

E-SWITCH®

Switch on EV Charging

Commitment

As the demand for electric vehicles has grown, so has E-Switch's breadth of products that cater to the market.

Value

Our products are built to withstand wet and dusty environments, extreme heat and cold, and with a minimum impact on cost and space requirements.

Expertise

Let our expert team of engineers and regional sales managers show you how E-Switch products add safety, efficiency and reliability to designs.

PVL SERIES

PILOT LAMP INDICATOR

- 6mm to 25mm panel cutout
- Solder lug, screw or wire leads (150mm long)
- Flat or domed lens
- Multiple lens colors
- Stainless steel, black anodized or nickel plated
